WELCOME

*Salut, willkommen, välkommen,
bienvenidos, privet, khush amdeed,
yōkoso, huānyíng, 'ahlaan bik...*

We can make a difference.

It is up to each of us, you and me, to take positive steps, to champion innovation in healthcare technology and to support healthcare tech entrepreneurs and thus to enable the providers of healthcare to deliver better outcomes, for less money. That's my vision and why I founded The GIANT Health Event.

Innovation, to me, is messy. It happens at the fringes. Innovation is not what large groups of people do in a structured, disciplined way. Tech innovation is Steve Jobs & Steve Wozniak in their parent's car garage. It's James Dyson in the garden shed. It's patients, and doctors, and nurses, and others who see a way to create better healthcare products and services and have the determination to turn those into successful international businesses.

GIANT - Global Innovation And New Technology - exists to champion these innovators so that together we can improve the health and wellbeing of people around the world. Thank you and welcome to The GIANT Health European Health Tech Event Week, 2021.

Left: Barry Shrier
GIANT Health Event 2019

Innovate / Collaborate / Accelerate

ABOUT GIANT

GIANT Health is a healtch innovation community of nearly 200,000 people.

Our events deliver high-impact networking and cost effective new business, sales and marketing.

Discobolus of Myron X GIANT Health

Our Vision

Our vision is to improve the health and well-being of people worldwide, by promoting healthcare innovation and supporting health-tech entrepreneurs.

We work to achieve this via our rapidly expanding global community of healthcare professionals and businesses. Our yearly event creates opportunities to connect people who would not have crossed paths otherwise.

Our Mission

Innovate. We have collected the largest community of health-tech innovators in the world.

Collaborate. We connect and support the entire global community of everyone whose business is within or relates to the healthcare industry

Accelerate. The GIANT Health event accelerates the invention and adoption of new health technologies.

Knowledge Quarter Liverpool

A World Leading Innovation District

Knowledge Quarter Liverpool (KQ Liverpool), a 450-acre urban innovation district, is home to some of the world's most influential players in science, health, technology, education, and the creative and performing arts.

With over £1bn of new developments underway – and a further £1bn in the pipeline – we are bringing forward new development opportunities, successfully attracting new investment,

increasing employment, improving graduate attraction & retention rates and strengthening the Liverpool City Regions position as a key player in the Northern Powerhouse.

Come and visit us on our stand on the 17th of May.

Sci-Tech Daresbury

Leading UK location to accelerate
Health and Life Science businesses:

- National science and innovation campus with 150 technology companies – start-ups to corporates
- Home to UK government-supported national laboratory working on next generation particle accelerator technologies including for oncology
- Hartree Centre - World-class centre for application of high performance computing, data science and AI into industry
- Host to the North West HealthTec cluster – bringing access to expertise and opportunities to support UK health and life sciences innovation

- “Home for Life” – leading UK location to establish and scale tech companies
- Successful international soft-landing programme – Supported the fast tracking and growth of companies into the UK for 5 years

Come and visit us on our stand on the 17th of May.

Bayer G4A Partnership program

Application window opening
April 19th, 2021.

#G4A

The program consists of the Growth and Advance Tracks. The Growth Track is designed for companies in the early-mid stage (Pre-seed- Series A) and the finalists will receive funding and mentorship from industry experts. The Advance Track is designed for mature companies with a product or solution already

in the market with traction. Companies selected for this track will be working jointly with Bayer experts to drive a commercial partnership. G4A is searching for digital health companies with innovative solutions focused on cardiometabolic and renal diseases as well as on women's health issues.

Liverpool City Region's global leadership in health & life sciences is driving innovation in specialist areas of MedTech, Immersive Technologies, Children's Health; Precision Medicine; Big Data, Sensors, Internet of Things; Infection and Veterinary Science.

At the very heart of our City Region, ethos is collaboration. As a City Region, we connect the greatest minds in health technology innovation, from our digital experts in the Baltic Triangle to our research power-house in the Knowledge Quarter and our Health-Tech and digital cluster at Sci-Tech Daresbury, working to help tackle local, national and global healthcare challenges.

We have one of the largest Freeports in the UK built to welcome the world, more hungry start-ups than almost anywhere else (second highest business birth rate in the UK), and the brightest minds solving some of the planet's most urgent social, healthcare and environmental challenges.

From experts in health economics, regulatory, IP issues and contract manufacturing, to those who can help accelerate speed to market and shape investment pitches, we nurture our businesses to help them connect and grow within our robust ecosystem, which includes a cluster of nine NHS trusts.

Liverpool City Region has one of the highest proportion of specialist hospitals and digital exemplars of any City Region outside of London, these are:

- Liverpool Hospitals University Foundation Trust
- Alder Hey Children's NHS Foundation Trust
- The Walton Centre NHS Foundation Trust
- Liverpool Heart and Chest Hospital NHS Foundation Trust
- Clatterbridge Cancer Centre NHS Foundation Trust
- Rutherford Cancer Centre
- Mersey Care NHS Foundation Trust
- Liverpool Women's NHS Foundation Trust
- Wirral University Teaching Hospital NHS Foundation Trust Southport & Ormskirk Hospital NHS Trust
- St Helens & Knowsley Teaching Hospitals NHS Trust

By utilising expertise from the local Academic Health Science Network (AHSN) – The Innovation Agency, Liverpool Health Partners and clinical research networks, innovators can start their path to the

INVEST LIVERPOOL

ADVANCING THE CITY REGION

NHS and unlock routes to undertaking clinical trials and expertise.

So if you are looking for your next step and aspire to work within a world-leading ecosystem then why not contact us at Invest Liverpool - the City Region's inward investment agency. We have a team of business location experts from across Liverpool City Region that can assist you in setting up or expanding your business here. We can make introductions to existing businesses, potential partners at our world-leading universities and business support networks and can provide detailed research on markets, sectors and workforce demographics, sites, premises and development opportunities help your business grow.

Our vision is to create one of the most globally competitive, environmentally responsible, socially inclusive economies in the UK and beyond. We're here for good, why not come and join us.

Liverpool City Region - a place with enormous appetite for science, health and innovation

Liverpool City Region has the most inspiring local stories, unbeatable assets and flagship projects approaching on the horizon, with a real focus on innovation. Yes, the world changed in 2020, but our drive for discovery whilst tackling some of the world's most demanding challenges, remains unshakeable.

Liverpool City Region has a mission to harness entrepreneurialism, ambition and creative curiosity to make it a place that is making the world a healthier and happier society for all and a place to do good.

It's a place for businesses who collaborate with passion, common purpose, determination and belief to make extraordinary things happen. From small scale co-operatives to innovation ecosystems, the City Region demonstrates that when like-minded people come together, they can move mountains.

Thriving Ecosystem of Support and Collaboration

The City Region is home to the eHealth Cluster which is the only SME-led eHealth Cluster in the UK. The cluster accelerates the scale and pace of innovation by working across organisations in the public, private and third sectors, engaging with and supporting both technology SMEs and the long-term care sector, including providers within domiciliary, supported living and residential care, and public bodies.

The HealthTec Cluster aims to bring together local expertise from across industry, academia, public sector, investor networks and entrepreneurs to stimulate innovation and tackle global challenges. Through the creation of this connective environment across the City Region, knowledge, skills and facilities are shared, boosting economic growth and driving productivity.

Expanding in the Liverpool City Region will place businesses at the heart of a world class ecosystem of expertise, ground-breaking R&D, clinical resources and public-private collaboration in Health & Life Sciences. Enabling businesses to grow, innovate and collaborate in a thriving ecosystem made up of global brands, academic institutions and innovative companies all benefiting from powerful support and investment.

Liverpool City Region has received sustained investment from global pharmaceutical brands, world-leading research institutions and domestic and international funders, therefore creating an environment rich with talent and infrastructure to fuel growth.

The City Region businesses will find collaborators and supply chain partners who have shared passion for discovery and innovation. They can tap into support from organisations dedicated to connecting industry, academia and the NHS, and benefits from links into nine NHS Trusts, the highest number of specialist hospitals outside of London.

Talented and Ambitious

Great places attract great talent. The cosmopolitan life and youthful energy charms and inspires curious, adventurous and ambitious minds from all over the world. Universities sit at the heart of Liverpool City Region, our globally renowned institutions – including the University of Liverpool, LJMU and the Liverpool School of Tropical Medicine – and the UK's first Life Sciences University Technical College (UTC) are producing new generation of scientists, healthcare practitioners, engineers and entrepreneurs for organisations to draw on as they develop and change.

Businesses can recruit from an exceptional talent pool cultivated by global brands, specialist hospitals, world leading universities and fast-growing tech clusters. The Liverpool City Region's 114,000-strong sector workforce and 27,000 students enrolled in health-related degrees contribute to one of the largest concentrations of Health & Life Science expertise in the UK. Retention rates in the City Region are some of the highest in the country, with close to half the graduates staying on to apply their new-found knowledge locally.

The University of Liverpool has an international reputation for research into advanced materials, personalised health and infectious diseases, making it a location rich in digital and manufacturing skills.

Future Facing

Throughout history the City Region has been a place where firsts happen. It's a place that has pioneered many new ideas across many sectors and understands that a rapidly changing society needs fresh thinking and innovative solutions.

Today, the City Region is a hot bed of new innovations tackling modern day problems. From vaccine development, biotech, Med Tech, glass to material science, and low-carbon energy, there is investment in the technology and know-how to deliver the innovations that the world will need tomorrow.

Growth sectors such as Health & Life Science are at the global forefront of developing business-changing technology, inventing life-changing applications for the Internet of Things and using robotics and supercomputing to push the boundaries with purpose.

The City Region has nurtured clusters of innovation where businesses can cross-pollinate with creative, health and digital pioneers, amplifying each other's vision.

The Knowledge Quarter and Sci-Tech Daresbury Enterprise Zones include nationally significant science and innovation assets, one of the world's first incubators dedicated to the development of business-changing sensor technology, and a Digital Innovation Facility purpose-built to help businesses benefit from ground-breaking R&D.

There is the highest concentration of robotics for materials science in the world, while the supercomputing facility for industrial applications at The Hartree Centre is the largest in the UK.

Sensor City at Knowledge Quarter is a global hub for the development of IoT technologies and provides entrepreneurs and SMEs with the facilities, business support and hands-on technical expertise they need to turn their innovations into commercially viable solutions. Sensor City provides rapid prototyping services and engineering support, carried out by a multi-disciplinary in-house team, enabling entrepreneurs to speed up their route to market.

Knowledgeable and Expert

Accelerate innovation and give R&D a greater opportunity for success with access to unique convergence of state-of-the-art facilities, technology, world leading expertise and academic research. Liverpool City Region has six of the nine NHS trusts named as Global Digital Exemplars and are internationally recognised for delivering improvements quality of care through the use of digital technologies and information. With an additional two being 'Fast Followers'.

The City Region is powered by relentless progress by the sharpest minds in health & life science and sustainability. The industry lead an all-encompassing drive for discovery through ground-breaking research. Not to mention the combined team of academics, public and private sector organisations improving health and well-being through the UK's largest 5G mm Wave mesh network.

Globally Connected

The City Region is perfectly positioned at the centre of the international stage, home to major multinationals and super-connected with excellent transport networks and rapid data infrastructure. It's a place to help businesses achieve faster, greener access to supply chain and customers across the UK and global markets.

Liverpool City Region is the UK's gateway to the world, bringing businesses and their audiences around the globe closer together. As the closest port to 50% of UK manufacturers, with a Deepwater terminal big enough for 95% of the world's largest ships, we handle almost half of the country's US cargo. There are two major airports within 45 minutes' drive, 10 motorways nearby and 10 major rail terminals.

Such strong networks create the ideal environment for growth through cross-sector partnering. And alongside the physical infrastructure, businesses will benefit from high-speed data connection from the City Regions 212km full-fibre, gigabit-capable network linked

to the transatlantic cable based in Sefton (part of Liverpool City Region) which connects the UK, North America and the rest of the world. No doubt that's why for many global companies, Liverpool City Region is the centre of their world. There's IBM at The Hartree Centre, Pilkington Glass in St Helens, and AstraZeneca in Speke. It's not just about business though – the City Region aim to bring ultra-fast digital connectivity to all by 2023.

Be a part of our future

Our vision is to be a place for leaders in Health & Life Science who are at the forefront of global research, unlocking better ways of living. We are creating a place for working together on global innovations in areas such as Med Tech, immersive technologies and Precision Medicine. So, if you're powered by an unstoppable determination to do the right thing, you'll feel right at home. We have a world of talent here already, but the space and appetite for much more.

We're here for good, why not come and join us.
